Potential Flying Devil,

Welcome to Air Force Reserve Officer Training Corps (AFROTC) Detachment 025; this is the first stop in your pursuit to join the world’s leading Air Force. As one of the top performing AFROTC detachments in the nation, Det 025 possesses the cadre, academics, and training methodology to turn America’s finest young adults into leaders in the United States Air Force.

Cadet life abounds with opportunities to test yourself mentally and physically. Your journey begins by enrolling in the Aerospace Studies class, Leadership Laboratory and the Physical Training course. Each of these programs follow a meticulous and proven strategy that will mold you into a versatile officer. The formal time commitment for an AFROTC cadet is approximately six hours per week, however, you will likely immerse yourself into other activities such as community service projects, leadership roles in the Cadet Wing, flight meetings, Color Guard, Arnold Air Society, Silver Wings and other extracurricular activities.

To assist your transition into AFROTC, my staff, the Cadet Wing and I invite you and your family to the new student orientation on Monday, August 13th in Life Sciences Tower E-Wing (LSE), room 104. This all-day event will kick-off promptly at 7:30 am and will showcase our ample facilities, comprehensive curriculum, and dynamic military training program. Orientation will also include a formal orientation briefing, a tour of the detachment, and most importantly, a question and answer period where you and your family can address specific topics.

I commend your commitment to serve this great nation. Pursuing a career in the United States Air Force is among the most noble and rewarding professions. We look forward to helping you and other bright men and women achieve your goals. Until then, do not hesitate to visit our website, https://afrotc.clas.asu.edu/ or call the detachment at (480) 965-3181 with any questions.

Welcome to Detachment 025...“Home of the Flying Devils!”

CHRISTOPHER R. PADBURY, Lt Col, USAF
Commander, AFROTC Det 025
